About Us

National Payment Solutions, LLC (“NPS”) is based out of Columbus, GA and is a privately owned technology provider in the electronic payments industry. We market National Automated Clearing House Association (“NACHA”) compliant software along with hardware for Lockbox and Accounts Receivable Conversion (“ARC”) services via the Automated Clearing House Network (“ACH”) and Federal Reserve Banking System. Planning for the future, we ensure our products are also Check 21 compliant. In addition to hardware, software and ACH services, we market a Self Serve ePayment Kiosk, Online Bill payments (WEB) along with Credit Card and Debit Card Processing. Our parent company, National Check Recovery, LLC (“NCR”) provides traditional Returned Check Processing services to merchants as well as an eRecovery platform for Child Support Returns for various states.

With over 100 combined years of industry and banking experience, our management, development, technical personnel and strong alliance partners have worked with and for key banking institutions in the check processing and collections industry. Our intimate knowledge of the check processing system and returned check processing system is a strong foundation for a functional, streamlined, solid system. Because of our commitment to promoting the success of our customers, this same foundation provides an additional competitive edge to those using our systems. We are prepared to walk our customers through the installation and implementation process from start to finish, as well as ongoing technical and customer support.

Our goal is to have the same reputation with our customers that we currently enjoy within the core institutions of the payment processing community.
