About Us

National Payment Solutions, LLC (“NPS”) is based out of Columbus, GA and is a privately owned technology provider in the electronic payments and check recovery industry. Along with traditional returned check processing services, NPS has developed the **ckCOLLECT System** for child support payments with various state disbursement units. In addition, we market National Automated Clearing House Association (“NACHA”) compliant software along with hardware for Lockbox and Accounts Receivable Conversion (“ARC”) services via the Automated Clearing House Network (“ACH”) and Federal Reserve Banking System (“Fed”). With a direct connection to the Federal Reserve Bank and Check 21 capability, NPS can provide a complete solution for payment processing and returns.

NPS has been in business since 1996 and continues to make innovative decisions as the company grows. With the leadership of our original founders, NPS continues to operate with a wealth of experience. Since the launch of our first product for traditional paper returns in 1996, we migrated into child support returns in 2000 and continued to progress by adding ARC services in 2004. Our management, development, technical personnel and collection staff has over 150 combined years with the company and has worked with and for key banking institutions in the payment processing and collections industry. Our vast knowledge of the payment processing system and returned payment-processing system is a strong foundation for a functional, streamlined, solid system. Because of our commitment to promoting the success of our customers, this same foundation provides an additional competitive edge to those using our systems. We are prepared to walk our customers through the installation and implementation process from start to finish, as well as ongoing technical and customer support.

Our goal is to have the same reputation with our customers that we currently enjoy within the core institutions of the payment processing community.
